Hgk106 motorcycle & atv PLASTIC repair kit

The Malcom Company Motorcycle and ATV Plastic Repair Kit, with the Weldy Plus Hot Air Tool, provides all that is needed for the repair and fabrication of thermoplastics.

Most all motorcycles and ATV's have thermoplastic body parts. These parts can easily crack or break. Rather than repair these parts with fiberglass epoxy (these types of repairs do not last long and look poor), and rather than replacement (can be expensive); the broken parts can be welded using a temperature controlled heat gun with a plastic welding nozzle attachment and special welding rod made to match the body part.

The Malcom Company motorcycle and ATV plastic repair kit includes all that is needed to perform these repairs, including detailed instructions on how to weld.

The kit is intended for personal use. For professional use, please ask about our PWK111 Plastic Welding Kit.

HGK106 KIT COMES COMPLETE WITH THE FOLLOWING

- Weldy PRO 1400W Heat Gun
- Heavy Duty Tool Box, plastic
- 2 lbs of welding rod (PVC, PP, LD PE, ABS, PC & HD PE
- 5 mm round nozzle
- Plastic Welding instruction manual
